69 APPENDIX: ADDITIONAL QUESTIONS
& RESPONDENT PROFILE

Background and Objectives

This report features the results of the 2023 IATA Aviation Safety Culture survey (I-ASC), carried out for Vietnam Airlines employees by IATA, in collaboration with research firm Ipsos.

The study is designed to gather Vietnam Airlines employee sentiment on a number of topics relating to safety culture, ranging from management commitment to communications.

By conducting this study, IATA wishes to support Vietnam Airlines' actions towards building a stronger safety culture, ultimately resulting in improved safety performance.

Additionally, IATA wishes to provide Vietnam Airlines with the means to meet SMS requirements to measure and continuously improve their internal Safety Culture through this standardized tool that can be part of organizations' safety management activities.

Survey Methodology

METHODOLOGY

Online survey – respondents filled out the survey on a computer or on a mobile device.

The questionnaire took 12 minutes on average to complete.

TARGET

Vietnam Airlines employees from the entire organization.

SAMPLE

5,301 employees completed the survey, from a total sample of 11,720 invites. 4,638 employees used the open link for a total of 9,939 completes.

DATA COLLECTION PERIOD

Between September 20 and October 24, 2023.

Reminders were sent by Ipsos on October 2, October 16, and October 20.

WEIGHTING

Results were weighted based on Hierarchy and Organization Section, to reflect the entire Vietnam Airlines workforce composition.

DEFINITIONS AVAILABLE TO SURVEY RESPONDENTS

Near Miss

An unplanned event that did not result in an accident, incident, injury, or damage, but had the potential to do so.

Gross negligence

A serious disregard to an obvious risk and profound failure to take such care that is evidently required in the circumstances.

Willful misconduct

A conscious and voluntary disregard of the need to use reasonable care, which is likely to cause foreseeable grave injury or harm to persons, property, or both.

I-ASC and Hudson Safety Culture ladder

How We Did It: Explaining Overall Safety Perceptions

In this study, we calculated the **correlation scores** between **59 individual statements relating to safety** (independent variables) and **two overarching safety perception statements** (dependent variables). This allowed us to determine the **importance of each statement** and rank them on the strength of the **relation to overall safety perceptions**. The **higher the score**, the **stronger the relationship** is between the variables.

WHAT IS THE RELATION BETWEEN THESE AREAS ...

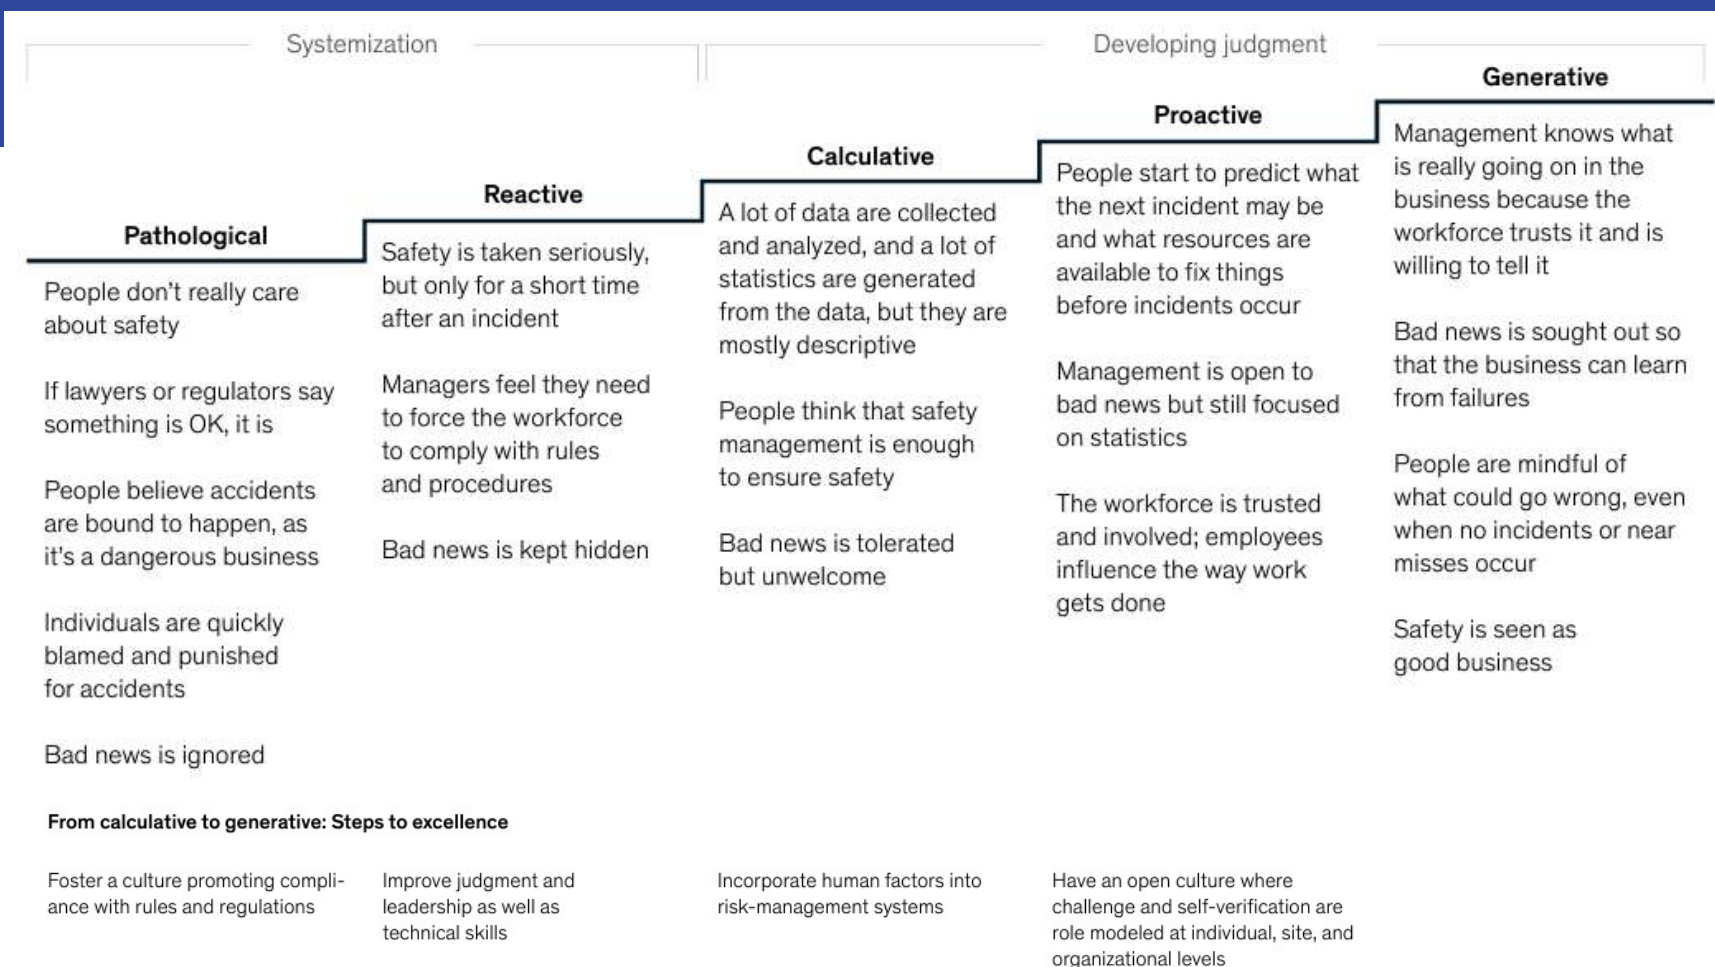

... AND THE OVERALL SAFETY PERCEPTIONS?

Safety Awareness (SAW)	Senior Management Commitment (SMC)	Management Commitment (MAC)
Employee Empowerment (EMP)	Reporting and Feedback (RFB)	Policies, Processes and Procedures (PPP)
Communications (COM)	Just Culture (JUS)	Learning Organization (LRN)

My employer always puts safety first.

My employer is one of the safest in the world.

-Leadership:

- Ensure that senior management is committed to safety and sets a good example.
- Provide regular safety training for all employees, including senior management.
- Hold regular safety meetings to discuss safety performance, identify potential hazards, and share best practices.
- Develop and enforce safety policies that are clearly communicated to all employees.

-Respect:

- Encouraging employees to report safety incidents and hazards without fear of reprisal.
- Involving employees in the development and implementation of safety policies and procedures.
- Recognizing employees for their contributions to safety.

-Mindful:

- Conducting regular risk assessments to identify potential hazards and develop plans to mitigate them.
- Encouraging employees to be vigilant and report safety hazards as soon as they are identified.
- Providing employees with the necessary equipment (such as PPE) and training to respond to emergencies effectively.

-Just and fair:

- Clearly defining safety policies and procedures and communicating them to all employees.
- Ensuring that the consequences of violating safety policies and procedures are well understood.
- Encouraging employees to report safety incidents and hazards without fear of reprisal.

-Learning:

- Conducting regular safety audits and inspections to identify areas for improvement.
- Analyzing safety incidents and near-misses to identify root causes and develop plans to prevent them from happening again.
- Sharing best practices and lessons learned across the organization and the ships.

Generative Safety Culture characteristics

—The organization knows what's happening in its physical businesses in real time across all levels. Unsafe conditions and activities are detected, reported, and acted upon without delay.

—The organization maintains control, even when things change in planned or unplanned ways. For instance, if equipment starts to malfunction, it is immediately checked, the problem documented, and a decision taken whether to suspend operations or continue for the moment with additional precautions in place.

—The organization relentlessly digs deeper into hidden causes, smaller hazards, unseen opportunities, and systematic controls. For instance, it monitors changing trends in the nature and severity of unsafe acts or conditions and the range and number of people who report them.

Generative Safety Culture

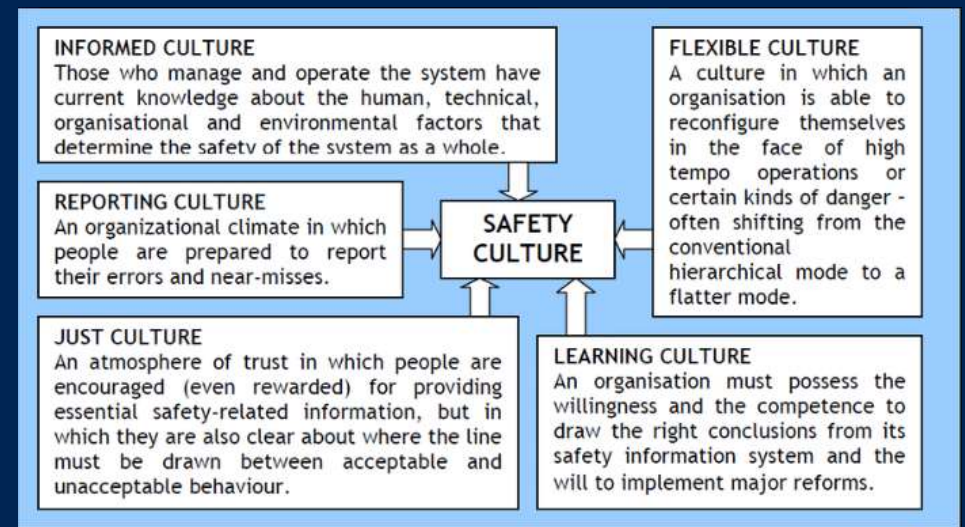

An organization that has reached this stage in its safety transformation isn't taken by surprise by hazards erupting into incidents or near misses. Nor does it wait for others to identify hidden opportunities to raise performance. Instead, it hunts for hazards, waste, and opportunities; rapidly captures the benefits to improve the way it does things in the future; and uses what it has learned to uncover the next set of hazards, waste, and opportunities.

This virtuous cycle generates continuous improvements in the organization's performance, safety, and capabilities and takes it closer to the practices and values that characterize the generative stage in safety leadership.

Hudson – 5 aspects of safety culture

Leadership: Effective safety culture begins with strong leadership. Leaders must set the tone and lead by example, always demonstrating a commitment to safety.

Respect: Regardless of their seniority, all team members should be respected when it comes to safety concerns. This leads to a culture of trust, where workers feel comfortable reporting errors and near misses.

Mindful: A mindful safety culture ensures that everyone is aware of the potential dangers and always ready for the unexpected.

Just and fair: A safety culture that is just and fair establishes clear lines between what is acceptable and unacceptable behavior, creating a culture of accountability and ensuring that everyone takes responsibility for their actions.

Learning: A safety culture that promotes continuous learning is willing to adapt and implement necessary reforms based on lessons learned. Such a culture encourages workers to report errors and near misses, and it uses these incidents as opportunities to learn.

Characteristics of Hudson ladder levels (1 of 2)

Dimension		Pathological	Reactive	Calculative	Proactive	Generative
E	What are the consequences for non-compliance?	<p>There are few rules about HSE, and those that exist are not enforced.</p> <p>Rule breaking is overlooked, unless something goes wrong - then the 'rule breaker' is disciplined or dismissed.</p> <p>Disciplinary action is mainly seen as a way to protect the organisation from liability.</p>	<p>'Workarounds' are quietly tolerated, as long as nothing bad happens, but obvious rule breaking is not acceptable, especially if an incident has happened recently.</p> <p>People who break rules are either assumed to be incompetent and sent on a training course, or assumed to be reckless and dismissed.</p>	<p>There is a set process for dealing with non-compliance. Its application is rigid and formalised.</p> <p>There are standard actions for the person involved, ranging from discipline to coaching, depending on the category of non-compliance. Actions are sometimes perceived as being unfair or inappropriate.</p>	<p>There is a formal process for dealing with non-compliance, with fair consequences for the individuals involved.</p> <p>It is recognised that people want to do a good job. Non-compliance is usually due to poor quality procedures. These are reviewed and improved.</p>	<p>Individuals feel they are held to account in a fair way.</p> <p>When non-compliance does happen, those involved are considered to be the best people to fix the gap in the system that led to the non-compliance.</p>
F	When do people intervene in unsafe situations?	<p>People look out for themselves. They only intervene in the most dangerous situations.</p> <p>Colleagues hide unsafe working practices to protect each other from being disciplined by management.</p>	<p>Colleagues are told they should intervene in unsafe situations, especially after there have been recent incidents. However, they do not consider intervening at the time, or worry how colleagues will react.</p> <p>Unsafe situations are often ignored.</p>	<p>People are asked to make a certain number of safety interventions and safety observations to meet the organisation's HSE targets.</p> <p>The number of interventions and observations is more important than their effectiveness. Interventions are sometimes confrontational and badly received.</p>	<p>There is genuine care for colleagues and this compels people to intervene in unsafe situations.</p> <p>People are trained on how to intervene (or receive intervention). Interventions usually lead to constructive discussions on how to do things better.</p>	<p>The level of care for colleagues is very high. It feels like a family where everyone looks out for each other.</p> <p>Intervention is rarely necessary, and always provides a welcome chance to work together and resolve potential HSE issues. The quality of conversation is very high.</p>

Characteristics of Hudson ladder levels (2 of 2)

G	<p>What priority is given to operational safety?</p> <p>(i.e. safety of your primary operations, whether that is drilling for oil, operating trains, or flying aircraft, etc.)</p>	<p>Production and cost reduction are the only priorities. Safety is seen as a cost.</p> <p>The principle is to do things as cheaply as possible while avoiding prosecution.</p>	<p>Keeping operations going is the number one priority.</p> <p>While cost reduction is important, money will be spent to fix safety issues to comply with legal requirements or in response to an incident.</p>	<p>The priority is implementing the HSE management system.</p> <p>Managers talk the talk about operational safety, but don't always walk the walk, especially when production or cost targets are not being met.</p>	<p>Operational safety is a high priority. There is open dialogue about how operational safety and other priorities are managed.</p> <p>The resources and time committed to achieving operational safety are ring-fenced and protected from other demands.</p>	<p>Operational safety is an unquestioned core value. It is understood that both business excellence and safety excellence are achieved with the same actions.</p> <p>The organisation refuses to place other performance objectives above operational safety.</p>
H	<p>What is the role of the HSE department?</p>	<p>If there is an HSE department it has little power or status and it only gets involved after an incident occurs.</p>	<p>The HSE department is seen as a career dead-end or the place to work just before retiring - once in, it is hard to get out. They are advisors who run safety meetings.</p> <p>They are seen as a police force.</p>	<p>The HSE department is large with status and power. It spends a lot of time analysing data, and preparing reports and guidance. It is seen as a separate function to other business operations.</p> <p>Its staff have deep subject matter knowledge and (usually) non-operational backgrounds.</p>	<p>The HSE department is an important specialist function. Its advice is trusted and sought by the line, including senior leaders.</p> <p>A period in HSE management is seen as career enhancing, and many senior leaders have HSE experience.</p>	<p>The HSE department has equal status with all other departments. Senior leaders must have HSE experience.</p> <p>The role of the HSE department is to provide expertise, coaching and specialist support to the operational managers who have the day-to-day responsibility for HSE.</p>

How We Did It: Explaining Overall Safety Perceptions

EXECUTIVE SUMMARY

Overall Safety Perceptions

The sentiment of the employees is high at Vietnam Airlines with an average score close to 6 out of 7 points.

MY EMPLOYER ALWAYS PUTS SAFETY FIRST
(AVERAGE SCORE)

MY EMPLOYER IS ONE OF THE SAFEST IN THE WORLD
(AVERAGE SCORE)

Senior Management ratings are lower than those of other Vietnam Airline employees

All subgroups have high results across all safety areas, with the exception of Sr Mgmt.

There is strong consistency in results by subgroup in all safety areas.

PERFORMANCE BY HIERARCHY/ AREA

Base: All respondents (n=9939)

*Caution, small base size (n<30).

CGO provides the highest ratings by Org Section

There is not much variation in ratings by Org Section.

Results are high across all subgroups.

PERFORMANCE BY ORGANIZATION SECTION

Base: All respondents (n=9939)

MAIN RESULTS

Overall Safety Perceptions

Most Vietnam Airlines employees agree with the statements “My employer always puts safety first” and “My employer is one of the safest in the world”. The proportion of employees who ‘strongly agree’ is higher for the safety-first statement.

Overall Safety Perceptions by Hierarchies and Org. Sections

Safety perceptions are higher among Admin and Management and ORG and CGO sections. Sr Management and CAB have the lowest perceptions of safety at Vietnam Airlines.

TOTAL AGREE (5-7)	AVERAGE	HIERARCHY				ORGANIZATION SECTION						
		Admin	Front Line	Mngmt	Sr Mngmt	MNT	CAB	FLT	GRH	DSP	ORG	CGO
Base: All respondents	9939	1665	6535	934	12*	788	1084	849	4426	114	758	1372
My employer always puts safety first.	89%	93%	87%	92%	68%	91%	84%	86%	90%	90%	94%	93%
My employer is one of the safest in the world.	87%	91%	85%	91%	60%	88%	84%	83%	88%	90%	93%	89%

Overall Safety Perceptions: Comparison to Benchmarks

Vietnam Airlines meets or exceeds the benchmark values for both statements across all Hierarchy and Org Section categories besides Senior Management.

TOTAL AGREE (5-7)	AVERAGE	HIERARCHY				ORGANIZATION SECTION						
		Admin	Front Line	Mngmt	Sr Mngmt	MNT	CAB	FLT	GRH	DSP	ORG	CGO
Base: All respondents	9939	1665	6535	934	12	788	1084	849	4426	114	758	1372

My employer is one of the safest in the world.	3%	2%	3%	1%	-29%	4%	1%	4%	5%	5%	4%	3%

Performance by Safety Culture Component

All components have very high scores. Ratings are slightly lower for SAW and JUS compared to other components.

Base: All respondents (n=9939)

Performance by Safety Culture Component

Results are high across all Hierarchy and Org Section subgroups. Sr Management is below average in a number of areas: MAC, LRN, COM, EMP, PPP, JUS, and RFB.

TOTAL AGREE (5-7)	AVERAGE	HIERARCHY				ORGANIZATION SECTION						
		Admin	Front Line	Mngmt	Sr Mngmt	MNT	CAB	FLT	GRH	DSP	ORG	CGO

WHAT REALLY MATTERS

Importance of Safety Culture Drivers

Looking at the impact of the safety areas on overall safety perceptions, Employee Empowerment (EMP) and Learning Organization (LRN) are the most important areas in relation to safety perceptions. Most areas are similar in terms of their impact on safety perceptions, except for Safety Awareness (SAW), which is of lower importance.

Base: All respondents (n=9939) * Derived from correlation analysis performed on each statement. See slide 7 for details.

Areas of Improvement

This chart maps the nine survey areas based on their performance (Total Agree **score from employees**) and their **importance**, derived from their relation to overall safety perceptions.

RFB, JUS, LRN: Improve performance

These are areas of lower performance, with high impact on overall safety perceptions.

PPP, MAC, SMC, COM, EMP: Maintain and Monitor for shifts

Given their high impact on overall safety perceptions, Vietnam Airlines should continue to maintain high performance in these areas.

SAW: Non-issue

This area is slightly lower in terms of performance but is also of lower importance.

DETAILED FINDINGS

EMPLOYEE EMPOWERMENT

SECTION I

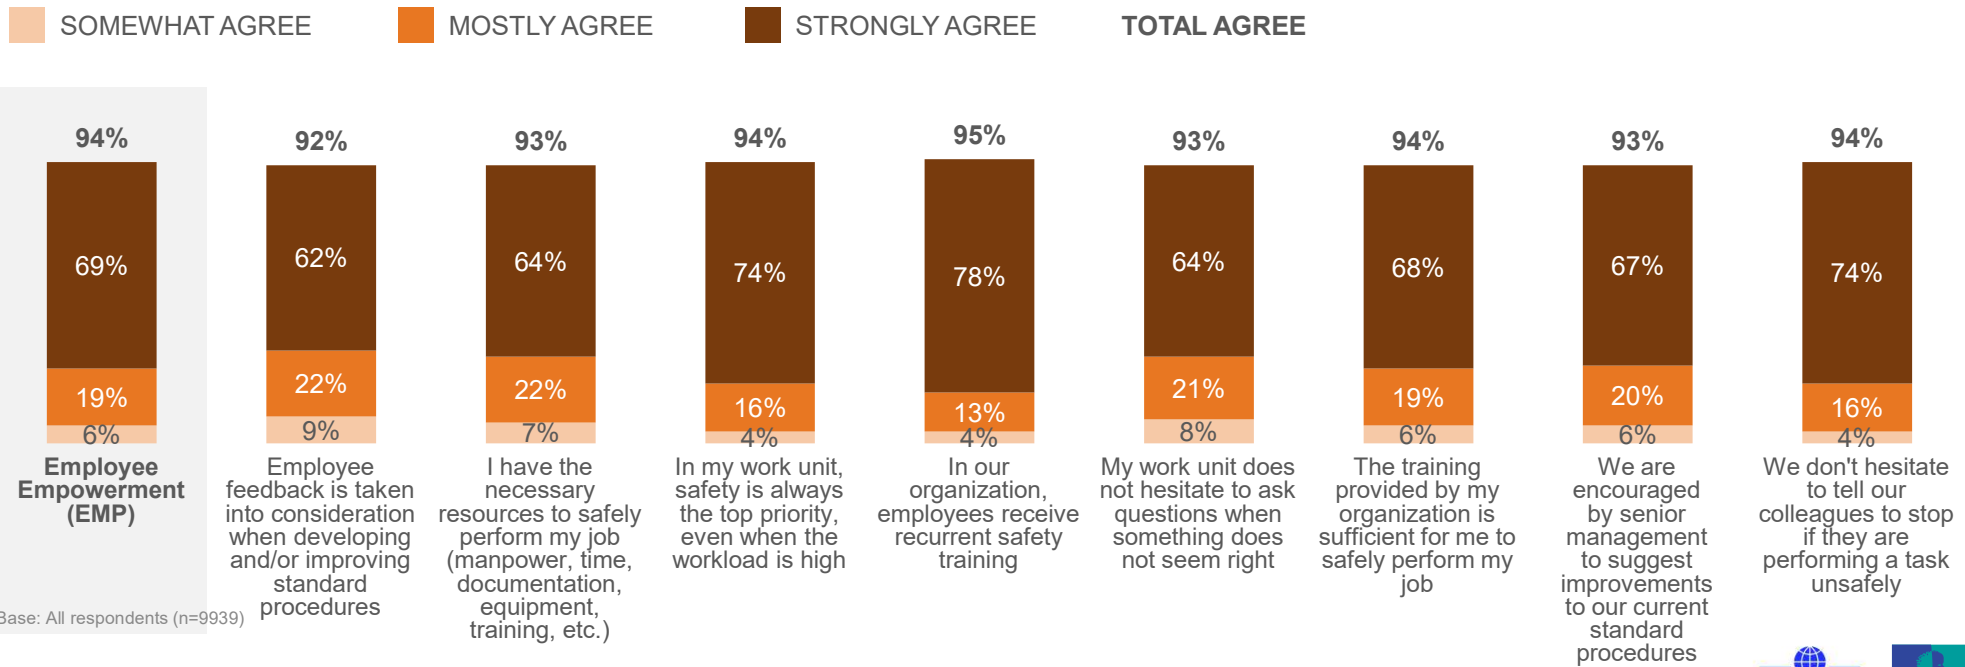

Performance on Individual Statements

Employee Empowerment ratings are across all statements. The highest score at 95% is for employees receiving recurrent safely training, while the lowest is employee feedback taken into consideration at 92%.

PERFORMANCE BY STATEMENT (AGREE 5,6,7 – SCALE OF 1-7)

Base: All respondents (n=9939)

Performance on Individual Statements

Ratings are highest for CGO, followed by MNT, GRH, and ORG. Front Line has lower ratings compared to Management. Employees under Senior Management have lower results compared to the average.

TOTAL AGREE (5-7)	AVERAGE	HIERARCHY				ORGANIZATION SECTION						
		Admin	Front Line	Mngmt	Sr Mngmt	MNT	CAB	FLT	GRH	DSP	ORG	CGO
<i>Base: All respondents</i>	9939	1665	6535	934	12*	788	1084	849	4426	114	758	1372
Employee Empowerment (EMP)	94%	94%	93%	95%	89%	94%	93%	92%	94%	92%	94%	95%
Employee feedback is taken into consideration when developing and/or improving standard procedures	92%	93%	92%	95%	85%	93%	91%	90%	93%	92%	94%	94%
I have the necessary resources to safely perform my job (manpower, time, documentation, equipment, training, etc.)	93%	94%	93%	95%	85%	93%	93%	93%	93%	91%	95%	94%
In my work unit, safety is always the top priority, even when the workload is high	94%	95%	93%	95%	85%	94%	93%	94%	94%	93%	94%	94%
In our organization, employees receive recurrent safety training	95%	94%	95%	94%	85%	95%	96%	94%	95%	93%	93%	96%
My work unit does not hesitate to ask questions when something does not seem right	93%	94%	93%	95%	93%	94%	92%	92%	93%	93%	94%	95%
The training provided by my organization is sufficient for me to safely perform my job	94%	92%	94%	94%	93%	94%	94%	92%	94%	92%	92%	94%
We are encouraged by senior management to suggest improvements to our current standard procedures	93%	95%	93%	95%	93%	94%	93%	91%	94%	93%	95%	95%
We don't hesitate to tell our colleagues to stop if they are performing a task unsafely	94%	95%	94%	96%	93%	96%	94%	94%	94%	90%	94%	95%

Performance on Individual Statements: Comparison to Benchmarks

In general, Vietnam Airlines is higher than benchmark values on all statements related to Employee Empowerment, aside from Sr Management, which is below benchmark for most statements. An area of strong performance is employee feedback being taken into consideration when developing/improving standard procedures.

TOTAL AGREE (5-7)	AVERAGE	HIERARCHY				ORGANIZATION SECTION						
		Admin	Front Line	Mngmt	Sr Mngmt	MNT	CAB	FLT	GRH	DSP	ORG	CGO
Base: All respondents	9939	1665	6535	934	12*	788	1084	849	4426	114	758	1372

In my work unit, safety is always the top priority, even when the workload is high	7%	7%	6%	2%	-7%	8%	6%	6%	9%	6%	8%	7%
In our organization, employees receive recurrent safety training	5%	4%	4%	3%	-6%	10%	2%	2%	7%	4%	6%	9%
My work unit does not hesitate to ask questions when something does not seem right	4%	2%	5%	1%	-2%	4%	3%	4%	6%	0%	3%	6%
The training provided by my organization is sufficient for me to safely perform my job	4%	3%	4%	3%	7%	9%	2%	3%	8%	1%	5%	4%
We are encouraged by senior management to suggest improvements to our current standard procedures	11%	7%	12%	4%	-2%	12%	9%	15%	11%	6%	11%	7%
We don't hesitate to tell our colleagues to stop if they are performing a task unsafely	4%	8%	4%	3%	0%	7%	4%	3%	6%	1%	9%	2%

Importance of Individual Statements

1st

**THE MOST IMPORTANT AREA
(OUT OF 9)**
Employee Empowerment impacts safety perceptions from the bottom up.

Employee Empowerment has significant relevance in relation to safety perceptions as workers are very close to every process. The statements with the greatest impact are “In my work unit, safety is always the top priority, even when the workload is high” and “We are encouraged by senior management to suggest improvements to our current standard procedures”.

RELATION TO OVERALL SAFETY PERCEPTIONS*

Base: All respondents (n=9939) * Derived from correlation analysis performed on each statement. See slide 7 for details.

LEARNING ORGANIZATION

SECTION II

Performance on Individual Statements

All statements have strong performance for Learning Organization. “We incorporate lessons learned into our work” (95% agree) has the strongest level of agreement, while “In our organization, we are confident that safety incidents that have occurred in the past will be less likely to happen again” having the least agreement (87%).

PERFORMANCE BY STATEMENT (AGREE 5,6,7 – SCALE OF 1-7)

Base: All respondents (n=9939)

Performance on Individual Statements

Looking at results by Org Section, MNT and CGO provide the highest ratings. Senior Management has the lowest ratings in Learning Organization.

TOTAL AGREE (5-7)	AVERAGE	HIERARCHY				ORGANIZATION SECTION						
		Admin	Front Line	Mngmt	Sr Mngmt	MNT	CAB	FLT	GRH	DSP	ORG	CGO
Base: All respondents	9939	1665	6535	934	12*	788	1084	849	4426	114	758	1372

Lessons learned from safety-related occurrences have led to positive changes in our organization	94%	94%	94%	96%	93%	96%	95%	93%	94%	94%	95%	95%
Once identified, safety issues are addressed properly	94%	95%	94%	94%	85%	94%	94%	93%	94%	95%	95%	94%
We incorporate lessons learned from incidents into our work	95%	95%	95%	97%	93%	97%	95%	94%	95%	94%	96%	96%

Performance on Individual Statements: Comparison to Benchmarks

Vietnam Airlines performs above than benchmark values for all LRN statements. Results for “In our organization, we are confident that safety incidents that have occurred in the past will be less likely to happen again” are lower than other statements. Sr Management scores are below benchmark values for most statements.

Importance of Individual Statements

2nd

THE 2nd MOST IMPORTANT AREA (OUT OF 9)

Properly addressing safety issues when identified is vital to overall perceptions.

Learning Organization is the second-most critical area in relation to overall safety perceptions at Vietnam Airlines. For the greatest impact, focus on identifying causes of incidents to improve safety performance.

RELATION TO OVERALL SAFETY PERCEPTIONS*

Learning Organization (LRN)

In our work unit we identify the cause of incidents to improve safety performance

Once identified, safety issues are addressed properly

Lessons learned from safety-related occurrences have led to positive changes in our organization

We incorporate lessons learned from incidents into our work

In our work unit we develop and implement improvements from the incidents to enhance safety performance

In our organization, we are confident that near-misses that were reported in the past will reduce the probability of a future incident

In our organization, we are confident that safety incidents that have occurred in the past will be less likely to happen again

Base: All respondents (n=9939)

* Derived from correlation analysis performed on each statement. See slide 7 for details.

MANAGEMENT COMMITMENT

SECTION III

Performance on Individual Statements

Performance in Management Commitment is high across all statements. 72% of employees strongly agreed with the statement “Our immediate management does not tolerate shortcuts that jeopardize safety”.

PERFORMANCE BY STATEMENT (AGREE 5,6,7 – SCALE OF 1-7)

Base: All respondents (n=9939)

Performance on Individual Statements

Ratings are highest for MNT, GRH, ORG, and CGO. Admin and Management have the highest ratings in Hierarchy with Sr Management recording below average scores on most statements.

TOTAL AGREE (5-7)	AVERAGE	HIERARCHY				ORGANIZATION SECTION						
		Admin	Front Line	Mngmt	Sr Mngmt	MNT	CAB	FLT	GRH	DSP	ORG	CGO

Importance of Individual Statements

3rd

THE 3rd MOST IMPORTANT AREA (OUT OF 9)

Knowing that management is committed to safety plays a critical role.

Management Commitment is very important to overall safety perceptions. The statement with the greatest impact, even though they all have impact, is “Our immediate management does not tolerate shortcuts that jeopardize safety”.

RELATION TO OVERALL SAFETY PERCEPTIONS*

Base: All respondents (n=9939) * Derived from correlation analysis performed on each statement. See slide 7 for details.

SENIOR MANAGEMENT COMMITMENT

SECTION IV

Performance on Individual Statements

All statements achieved very high results. The statement that scored lowest is “In our organization, focus on safety is in balance with commercial and operational priorities”.

PERFORMANCE BY STATEMENT (AGREE 5,6,7 – SCALE OF 1-7)

Base: All respondents (n=9939)

Performance on Individual Statements

Ratings are highest for ORG and CGO and for Admin and Management. Sr Management is lower on some statements compared to average.

TOTAL AGREE (5-7)	AVERAGE	HIERARCHY				ORGANIZATION SECTION						
		Admin	Front Line	Mngmt	Sr Mngmt	MNT	CAB	FLT	GRH	DSP	ORG	CGO

Importance of Individual Statements

6th

THE 6th MOST IMPORTANT AREA (OUT OF 9)

Focus on safety communications between supervisors and the team.

Communications, while of lesser importance than some of the other components of Safety Culture, still has a strong overall impact on safety perceptions at Vietnam Airlines. The most relevant statement, even though they all have impact, is that in the organization, safety-related “lessons learned” are communicated to employees.

RELATION TO OVERALL SAFETY PERCEPTIONS*

JUST CULTURE

SECTION VII

Performance on Individual Statements

Performance for Just Culture recorded high levels on most statements. However, the statement “Mistakes in our work unit are corrected without punishment and treated as a learning opportunity” recorded below average scores (82% agree).

PERFORMANCE BY STATEMENT (AGREE 5,6,7 – SCALE OF 1-7)

Performance on Individual Statements

Ratings are highest for GRH, ORG, CGO, and Management. CGO reported above average scores for “Mistakes (errors) in our work unit are corrected without punishment and treated as a learning opportunity” compared to all other subgroups, and FLT below the average score. Sr Management scores are below average for all statements.

Importance of Individual Statements

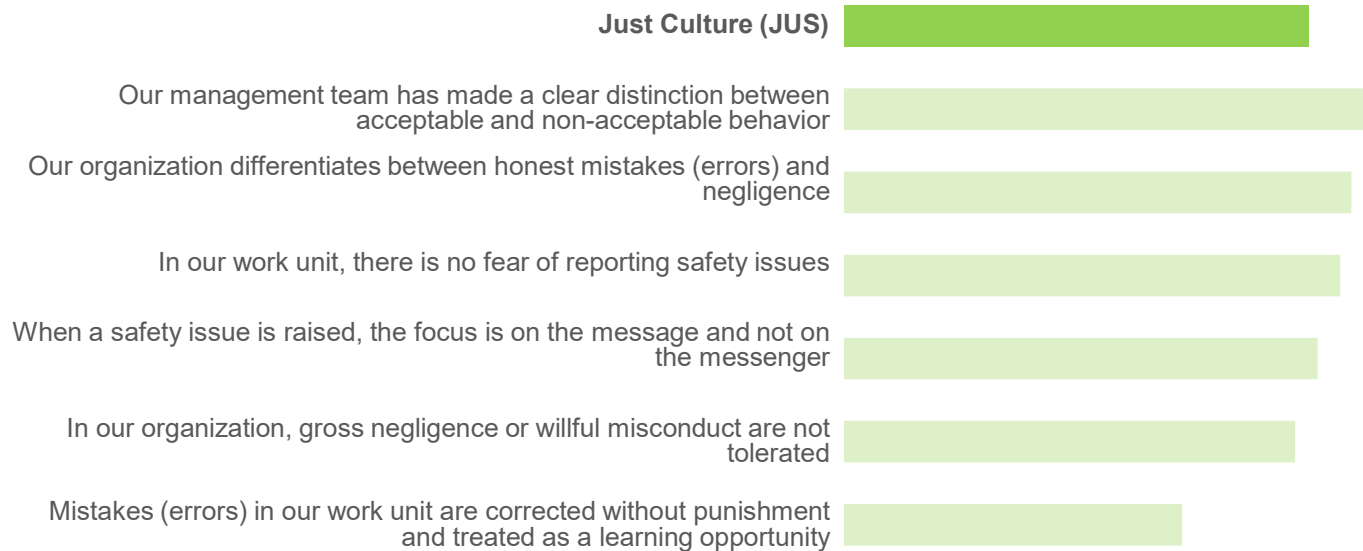

7th

THE 7th MOST IMPORTANT AREA (OUT OF 9)

In safety matters, focus on the message, not the messenger.

The most impactful statement in Just Culture is “Our management team has made a clear distinction between acceptable and non-acceptable behavior”, followed by “Our organization differentiates between honest mistakes (errors) and negligence”.

RELATION TO OVERALL SAFETY PERCEPTIONS*

Base: All respondents (n=9939) * Derived from correlation analysis performed on each statement. See slide 7 for details.

REPORTING AND FEEDBACK

SECTION VIII

Performance on Individual Statements

Performance for Reporting and Feedback is high overall (93%). Nearly all Vietnam Airlines employees know how to report safety issues (94%) and about half of employees have reported a safety issue before.

PERFORMANCE BY STATEMENT (AGREE 5,6,7 – SCALE OF 1-7)

REPORT SUBMISSION

Performance on Individual Statements

GRH, CAB, CGO, and Management provide the highest ratings for RFB. While Sr Management is below average on most statements, Sr Management is above average on reporting safety issues, along with Management and FLT employees.

Importance of Individual Statements

8th

THE 8th MOST IMPORTANT AREA (OUT OF 9)

While still important, RFB is of lesser impact compared to the other areas.

Reporting and Feedback is an area of lower impact to safety perceptions. In this area, although all statements have similar impact overall, it is key to keep the work unit informed of the outcomes of safety issues that were raised.

RELATION TO OVERALL SAFETY PERCEPTIONS*

Reporting and Feedback (RFB)

Our work unit is informed about the outcome of the safety issues we raise

In our work unit, we are encouraged to report near-misses

We are given timely feedback on the safety issues we raise (even if the decision is to do nothing)

I know how to report safety issues

Base: All respondents (n=xxx) * Derived from correlation analysis performed on each statement. See slide 7 for details.

SAFETY AWARENESS

SECTION IX

Performance on Individual Statements

Almost all Vietnam Airlines employees agree with the statement “I fully understand my job responsibilities” (96%), and 81% strongly agree. 63% of employees are aware of safety issues that are not adequately addressed.

PERFORMANCE BY STATEMENT (AGREE 5,6,7 – SCALE OF 1-7)

Performance on Individual Statements

SAW ratings are highest for GRH, CAB, and Front Line. GRH and Sr Management are most likely to be aware of safety issues that are not adequately addressed.

Importance of Individual Statements

9th

THE 9th MOST IMPORTANT AREA (OUT OF 9)

Safety awareness has the lowest overall impact on perceptions of safety at Vietnam Airlines.

The overall impact of Safety Awareness is lower than the other components of Safety Culture at Vietnam Airlines. The statement which most contributes to safety perceptions, even though many others are similar in their contribution, is “My work unit’s actions support the achievement of our organization’s safety objectives”.

RELATION TO OVERALL SAFETY PERCEPTIONS*

Base: All respondents (n=9939) * Derived from correlation analysis performed on each statement. See slide 7 for details.

APPENDIX: ADDITIONAL QUESTIONS & RESPONDENT PROFILE

Performance on Individual Statements

Most Vietnam Airlines employees agree with all statements. Particularly, 95% of employees agree with the statement “My organization is ready to deal with safety situations if something goes wrong”.

PERFORMANCE BY STATEMENT (AGREE 5,6,7 – SCALE OF 1-7)

Base: All respondents (n=9939)

Change and Risk Management

Sr Management is below average for most statements. MNT is below average for “Crisis management is considered important in my organization.”.
